Pacific Time Systems is happy to announce the release of the new NOVATOUCH II biometric finger reader designed for use with NOVAtime 3000 or 4000 web service applications. The reader is ideal for company's who need

biometric capability for office personnel and "clean" type operations. The reader is not a fingerprint scanner but a biometric reader that utilizes technology similar to the Recognition Systems Hand punch terminals and ultimately prevents buddy punching. The USB device can be quickly connected to the back of each computer using the Employee Web Services component and securely records login/out activity. The finger reader replaces the need to input a

password.

>How's Payroll Going?

Is your Payroll Service working for you?

According to Jeremy Sacco, an Editorial Staff member of BuyerZone.com, even the most meticulous and experienced human resources professionals find that handling payroll can be a headache. For many businesses, payroll services offer an attractive and valuable alternative to in-house processing. They can provide a less expensive, simpler means of paying employees, filing taxes, and performing other essential but mundane tasks. Based on his research, the following are some of the services normally provided by a payroll service:

- Calculating paycheck and tax obligations for each employee
- Printing and Delivering paychecks
- Provide Management Reports
- Automatic Check Signatures (additional fees may apply)
- Direct Deposit (additional fees may apply)
- Handling of W-2s (additional fees may apply)
- Tie-ins with 401(k) and Section 125 mutual fund plans (additional fees may apply)
- Filing State and Federal payroll taxes for your business (additional fees may apply)

Is your payroll service working well for your operation? If no, please contact us immediately. Pacific Time Systems works with many reputable payroll service companies and can put you in touch with a provider that may better suit your needs. Remember: NOVAtime interfaces with over 150 services. A list is available on our website at www.pactime.com.
